

Quik Dri 8000

Quik Dri 8000 is a mildly alkaline water-soluble liquid rinse aid developed for use as a final rinse, in plating cycle, prior to forced hot air or sawdust drying. It will reduce the amount of water on the work, therefore, making drying easier and minimize spotting, stains, or discoloration of nickel plate or chrome plate.

Product color will darken with age but not affect the quality or performance.

Features & Benefits

Water soluble liquid	Easy tank side additions
Reduces water on part surface	Reduces spotting on parts

Operating Conditions

Concentration	¼% – 1%
Temperature	150°F – 190°F (65°C – 88°C)
Equipment	Stainless steel, Polypropylene, rubber lined steel or coated steel tanks.
Heaters	Stainless steel or quartz
Control	Prepare a fresh solution every day

Waste Disposal

Rinses containing Quik Dri 8000 may be discarded to sewer or settling lagoon. However, in order to be completely informed on the latest regulations for your area, please contact the local authorities.

Caution

Even though Quik Dri 8000 is a mild alkaline solution, avoid eye, skin and oral contact. Wear goggles and gloves when handling the product. Flush exposed areas immediately with clean, cold water.
